

# TEACHING FINANCIAL LITERACY with TiViTz and NIE

## A FREE WORKSHOP FOR TEACHERS OF GRADES 3-8

Seventy percent of U.S. eighth-graders cannot perform math at grade level. Building a strong math foundation in elementary school is key to helping students succeed in higher math subjects.

Learn how you can use the match and strategy game TiViTz in your classroom to sharpen kids' math skills and encourage critical thinking – and discover how you can help your students prepare for their future with the new TiViTz College Savings Game-a-thon!

### Workshop highlights:

- The first 25 teachers to register will receive a free TiViTz board game for their classroom!
- Presentation by TiViTz experts
- Complimentary curriculum supplements and handouts
- Strategies for close reading, writing activities and document-based questions from Florida Standards experts
- What Newspaper in Education can do for you!
- Complimentary refreshments

Thursday, Dec. 11  
5:30 – 8:30 p.m.
