Talking points

1. Find newspaper reports about U.S. drone aircraft strikes. Where are the attacks taking place? Who is being killed?
2. How are drone targets chosen? What safeguards are in place to protect the innocent? Are they effective?
3. Are drone attacks just another military operation or assassinations? What is the difference?
4. Are U.S. foes likely to obtain drone technology? Will Americans be targeted by drones?

Between the lines

"Their policy is to take out high-value targets, versus capturing high-value targets."

- Sen. Saxby Chambliss, R-Georgia
