

Cartoons for the Classroom

Presented by NIEonline.com and the Association of American Editorial Cartoonists (AAEC)

Do we ignore scientists' warnings?

Nick Anderson, Houston Chronicle / Courtesy of AAEC

Talking points

1. What science issues do these cartoons address?
2. What do the cartoons say about how we are dealing with these threats?
3. Why didn't governments do more to restrict the overuse of antibiotics?
4. Why aren't governments doing more to control man-made climate change?
5. What has stalled U.S. action on the Zika virus?
6. Does worrying about costs to farmers, business, workers and taxpayers threaten our safety?

Between the lines

"If our leaders were waiting to act until they could see the cliff's edge, I hope this opens their eyes to the abyss that lies before us." - Lance Price, antibiotic center.
