

# Cartoons for the Classroom

Presented by NIEonline.com and the Association of American Editorial Cartoonists (AAEC)

## Why is covid-19 exploding again?

Jimmy Margulies / Courtesy of AAEC

### Talking Points

1. How do these cartoons comment on the record increases in covid-19 cases in the United States and the world?
2. Why are we now experiencing an “explosion” of coronavirus infections along with shortages in hospital beds and supplies?
3. What should we do until a vaccine becomes widely available in about six months?
4. Are you willing to wear a mask and avoid crowds to reduce coronavirus infections and deaths? Why or why not?
5. Who said we wouldn't hear about covid-19 after the election?

### Between the lines

“It's getting bad and it's potentially going to get a lot worse. The months ahead are looking quite horrifying.” - Jennifer Nuzzo, Johns Hopkins Center epidemiologist.
