

Governors blamed in vaccine rollouts

Mike Marland / Courtesy of AAEC

Talking Points

1. How do these cartoons depict COVID-19 vaccine distribution in New Hampshire and New York?
2. Should governors be held responsible for delivering the vaccines in their states?
3. Who else has a role in vaccine rollouts? Drug firms? Presidents? Lawmakers? Health care?
4. Do you know anyone who has received a COVID vaccine? Did they have difficulty getting it?
5. It takes time to produce millions of vaccine doses. Is it difficult to wait patiently when you are worried about getting a deadly disease?

Between the lines

"It's chaos. If they want to vaccinate 80% of the population, good luck, if this is the system. We'll be here in five years." - New York City resident Joan Jeffri, 76.
