

Cartoons for the Classroom

Presented by NIEonline.com and the Association of American Editorial Cartoonists (AAEC)

Why did Florida reject math books?

THESE TEXTBOOKS WOULD INDOCTRINATE CHILDREN WITH THIS SYMBOL OF EVERYTHING WE STAND AGAINST.

Pat Byrnes / Courtesy of Cagle.com

1. What are these cartoons saying about Florida rejecting 54 math textbooks because they “contained prohibited topics?”
2. Fla. Gov. Ron DeSantis last week signed a “stop WOKE” law, which restricts how race is discussed in schools, colleges and workplaces. Does the law violate the right to free speech?
3. DeSantis also signed bills to punish Disney for opposing the new law. If Disney loses millions of dollars, will it spend millions to defeat DeSantis and his allies?
4. Does learning about slavery, segregation or genocide make you feel bad about yourself?

Between the lines

“They’re accusing some invisible enemy of indoctrination. Meanwhile, they’re the ones indoctrinating students by attempting to censor mathematic textbooks.” - Fla. Rep. Anna Eskamani
