1. What are these cartoons saying about election fraud and who is to blame?
2. Voter fraud is illegal interference to change an election outcome. Could 513 proven cases of voter fraud out of more than 685 million votes cast since 2016 change very much?
3. Did Donald Trump ever legally prove any of his claims of voter fraud after he lost the 2020 vote?
4. Who do you trust to run fair elections – your state and local officials or authorities in Washington, DC? Why?
5. Are hidden contributors of millions of dollars to Republican and Democrat candidates a bigger threat to election integrity?

Between the lines

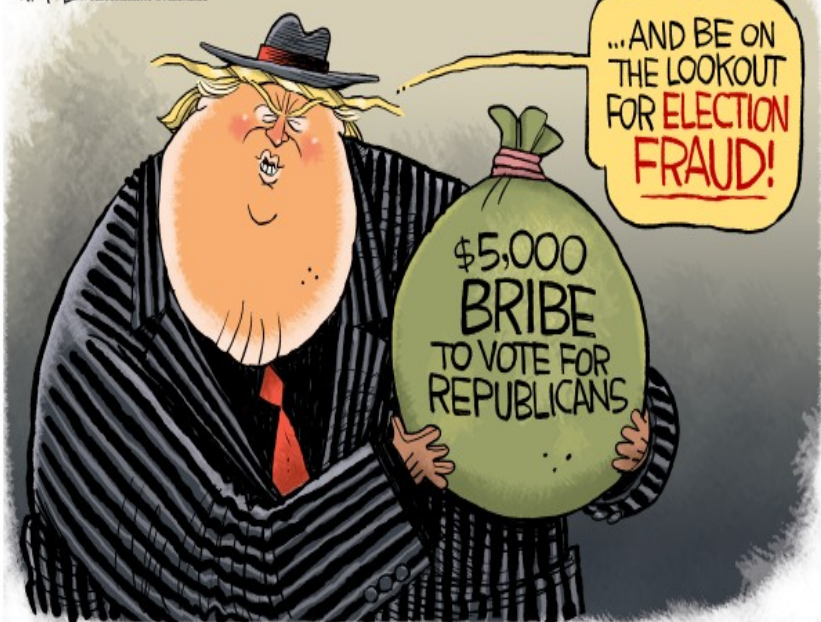

"Voter fraud is not an issue in the United States. Our states, our local officials, our county officials are doing an excellent job in keeping those numbers extremely low. And that's a sign of the strength of our election system."
— Michael McNulty, election researcher.
